archaeologie – biblatex for archaeologists*

Lukas C. Bossert† Johannes Friedl

Version: 2.0 (2016-06-06)

Abstract

This citation-style covers the citation and bibliography rules of the German Archaeological Institute. Various options are available to change and adjust the outcome according to one's own preferences. The style is compatible with the English, German, Italian, Spanish and French languages, since all `bibstrings` used are defined in each language.

For a short introduction in German see http://mirrors.ctan.org/macros/latex/contrib/biblatex-contrib/archaeologie/archaeologie-ger.pdf

1 Installation

archaeologie is part of the distributions MiKTeX[1] and TeXLive[2] – thus, you can easily install it using the respective package manager. If you would like to install archaeologie manually, do the following: Download the folder archaeologie with all relevant files from the CTAN-server[3] and copy it to the $LOCALTEXMF directory of your system.[4] Refresh your filename database.[5]

2 Usage

archaeologie

The name of the bibLaTeX-style is archaeologie has to be activated in the preamble.

```
\usepackage[style=archaeologie,%
          ⟨further options⟩]{biblatex}
\bibliography{⟨bib-file⟩}
```

Without any further options the style covers now the rules of the German Archaeological Institute. No additional settings are needed. But you can change the outcome by using some options which are explained below.[6]

At the end of your document you can write the command \printbibliography to print the bibliography. Since archaeologie supports different citations of various texts like

1 Website: http://www.miktex.org.
2 Website: http://www.tug.org/texlive.
3 http://mirrors.ctan.org/macros/latex/contrib/biblatex-contrib/archaeologie.zip
4 If you don't know what that is, have a look at http://www.tex.ac.uk/cgi-bin/texfaq2html?label=tds or http://mirror.ctan.org/tds/tds.html.
5 Here is some additional information from the UK TeX FAQ:
- Where to install packages
- Installing files "where LaTeX/TeX can find them"
- "Private" installations of files

6 For an easy and unproblematic compiling we suggest to use XeLaTeX or LuaTeX.

from ancient authors and from modern scholars we suggest to have them listed in separated bibliographies. Further information are found below (section 6).

3 Overview

Following there is a quick overview of possible options of the style archaeologie. Contrary to the alphabetically ordered description later (section 4) they here are listed by topic. Furthermore you can – at your own risk – also use the conventional bibLaTeX-options which are related of indent, etc. For that please see the excellent documentation of bibLaTeX.

3.1 Preamble options

3.1.1 Additional bibliographies and macro lists

bibancient A separate bibliography-file is loaded, in which round about 600 ancient authors and works are listed and can be cited right away cf. section 4.1.1.

bibcorpora A separate bibliography-file is loaded, in which the common corpora for ancient studies are stored cf. section 4.1.2. Additionally this activates the bibliography archaeologie-lstabbrv.bib.

lstabbrv Activates the additional bibliography file archaeologie-lstabbrv.bib. It provides a list of journals and series according to the abbreviations of the German Archaeological Institute which can be used as @String macros in bibliography entries cf. section 4.1.4.

lstlocations Activates the additional bibliography file archaeologie-lstlocations.bib with @String macros of locations which can be used to automatically print out their correct exonym in the selected language cf. section 4.1.5.

lstpublishers Activates the additional bibliography file archaeologie-lstpublishers.bib with @String macros of several publishers which can be used to easily print out their names cf. section 4.1.6.

3.1.2 Notation of names

bibfullname In the bibliography full names of authors and/or editors are shown cf. section 4.1.14.

fullnames Writes only first and family names of authors or editors when they are cited with \citeauthor{⟨*bibtex-key*⟩} cf. section 4.1.11.

initials First names are abbreviated keeping digraphs and trigraphs cf. section 4.1.20.

lastnames Writes only family names of authors or editors when they are cited with \citeauthor{⟨*bibtex-key*⟩}. In footnotes this is default cf. section 4.1.11.

scshape Cited names are shown with small capital letters cf. section 4.1.13. Bibliography entries with option={ancient} or option={frgancient} (sections 4.2.1 and 4.2.2) are not touched by this option.

3.1.3 Manner of citing

edby Switches “ed.”/“Hrsg.” to “ed. by”/“hrsg. v.” cf. section 4.1.17.

inreferences Each bibliography entry which is a @Inreference is fully referenced according to the special rules of the German Archaeological Institute for manuals and encyclopaedias cf. section 4.1.9.

noabbrv By default the short titles of journals and series (shortjournal and shortseries) are shown in the bibliography. With this option full titles are printed instead (journaltitle and series) cf. section 4.1.15.

publisher All locations and the publisher is shown. It also changes the format of the edition and the first print cf. section 4.1.16.

seenote By default archaeologie prints author-year-system. With this option you can change it to a different outcome (but still according to the rules of the German Archaeological Institute). So the first citation will be a full citation and all the following citations will refer to the first full citation cf. section 4.1.7

translation Original title, translator and original language are shown in the bibliography. Setting a bibliography entry to option={ancient} this behaviour is default cf. section 4.1.8.

yearinparens The year is shown in parens cf. section 4.1.12.

yearseries Switches the order of series and year cf. section 4.1.10.

3.1.4 Global bibliography settings

width width={value} defines the bibliography width between label and reference cf. section 4.1.18.

counter Reveals at the end of each reference a summary of citations in the text cf. section 4.1.19.

3.2 Entry Options

A single bibliography entry can contain a value in its options-field. Depending on the option it changes the behaviour how that entry is cited cf. sections 4.2 and 5. Beside their distinct properties all of these options have in common that the separating comma between citation and page record is missing. Actually this concerns citation of ancient texts and corpora where usually the shorthand-field is printed in citations.

ancient The entry is an ancient source (e. g. Cicero, Plutarch, etc) cf. section 4.2.1.

frgancient The entry is a fragmented ancient source (e. g. Festus) cf. section 4.2.2.

corpus Only the shorthand-field is printed. This is needed especially for corpora of inscriptions or coins (CIL, AE, RIC, etc.) cf. section 4.2.3.

3.3 Cite commands

\cite As always citing is done with \cite:

\cite[⟨*prenote*⟩][⟨*postnote*⟩]{⟨*bibtex-key*⟩}

⟨*prenote*⟩ sets a short preliminary note (e. g. "Vgl.") and ⟨*postnote*⟩ is usually used for page numbers. If only one optional argument is used then it is [⟨*postnote*⟩].

```
\cite[⟨postnote⟩]{⟨bibtex-key⟩}
```

The ⟨*bibtex-key*⟩ corresponds to the key from the bibliography file.

\cites If one wants to cite several authors or works a very convenient way is the following using the \cites-command:

```
\cites(pre-prenote)(post-postnote)[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}%
                                  [⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}%
                                  [⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}...
```

\parencite Sometimes a citation has to be put in parentheses. Therefore we implemented the command \parencite:

```
\parencite[⟨postnote⟩]{⟨bibtex-key⟩}
```

This cite command takes care of the correct corresponding parentheses and brackets. Especially in @Inreference citations the parentheses are changing to (square) brackets. The example shown in section 7.3 makes it clear.

\parencites Of course there is also the possibility to cite several authors/works in parentheses. This is done with \parencites:

```
\parencites(pre-prenote)(post-postnote)[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}%
                                       [⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}%
                                       [⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}...
```

\textcite Beside the listed \cite commands above there is a third way of citing: \textcite is useful if the author should be mentioned in the text and the remaining components like year and page will immediately follow in parentheses.

```
\textcite[⟨postnote⟩]{⟨bibtex-key⟩}
```

\textcites And again there is also a \textcites in case of several authors:

```
\textcites(pre-prenote)(post-postnote)[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}%
                                      [⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}%
                                      [⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}...
```

\citeauthor \citetitle Furthermore and additionally to the ›normal‹ \cite-commands one can also cite only the author or the work title in the text and in the footnotes.

```
\citeauthor[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}
```

and for the works

```
\citetitle[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}
```

For further information cf. section 4.1.11.

3.4 Entries with @String

The citation rules of the German Archaeological Institute instruct to abbreviate journals and series according to a given list.[7] For this purpose we provide a list with bibliography macros which refer to these abbreviations. These abbreviations can be included by loading package option lstabbrv (cf. section 4.1.4). Besides there are two further lists with @String macros cf. sections 4.1.5 and 4.1.6.

@String

The style archaeologie respects the guidelines of the German Archaeological Institute and is therefore compatible with the given abbreviations of journals and series. To minimize the susceptibility to errors and to omit unnecessary typing of sometimes very long journal titles archaeologie works with so-called @Strings. The advantage of these @Strings is that several bibliography entries can be defined by one globally given value. The @String is loaded at begin of the bib-file, therefore all @Strings have to be previous to all other bibliography entries.

To use this offer of simplification the bibliography fields for the title of the journal (journaltitle) and its short form (shortjournal), as well as the name of the series (series) and its shortform (shortseries) have to be written with a @String. In section 12 there is a list with all the abbreviations given by the German Archaeological Institute, in which the @String (with endings -short for shortjournal or shortseries) are listed in the left column. A @String has to be written *without* any curly brackets.[8]

An example shows how to use it:

```
@Article{Koyunlu1990,
  author       = {Koyunlu, A.},
  title        = {Die Bodenbelage und der Errichtungsort der Hagia Sophia
    },
  journaltitle = AyasofyaMuezYil,   %@String used
  shortjournal = AyasofyaMuezYil-short,   %@String used
  volume       = {11},
  pages        = {147--156},
  year         = {1990},
}
```

Example 3.1 – @Article{Koyunlu1990,...}

That article appeared within a rather unusual journal, which should be abbreviated with ›AyasofyaMüzYıl‹.

To save the time to look for the special character and insert ›ı‹ manually it is written in the @String with an ›i‹ (for further information see section 12) but will be replaced after compiling with the correct character:

[3.1] Koyunlu 1990 A. Koyunlu, Die Bodenbelage und der Errichtungsort der Hagia Sophia, AyasofyaMüzYıl 11, 1990, 147–156

Whether using the provided abbreviation list with lstabbrv or filling the journaltitle and shortjournal fields manually, archaeologie uses by default short titles if defined.

7 http://www.dainst.org/documents/10180/70593/03_Liste+abzukürzender+Zeitschriften_quer.pdf/2646d351-8e5d-4e8b-8acd-54f3c272d3ff <2016-06-06>

8 If you use *JabRef* in its non-coding window, then you have to write #AyasofyaMuezYil#. JabRef converts this internally to a @String and omits the # in the coding window. *BibDesk* provides such conversion as well by pressing cmd-R which enables direct BibTeX typing without enclosing curly brackets.

The default embedding of such abbreviations can be switched off, of course. In case you use the package option `noabbrv` in the preamble (see section 4.1.15), then the output changes as follows:

[3.1] Koyunlu 1990 A. Koyunlu, Die Bodenbelage und der Errichtungsort der Hagia Sophia, Ayasofia Müzesi yıllığı. Annual of Ayasofya Museum 11, 1990, 147–156

Nevertheless the advantage of our abbreviation list lies in the possibility to create a separate bibliography with all the abbreviations of used journal titles and series (see section 6) without being prone to citation differences and typing errors.

However, if a journal or a series is *not* included in the list (section 12) then this journal/series will *not* be abbreviated and converted to full title in curly brackets in the respective field e. g. `journaltitle={`⟨*title of the journal*⟩`}` or `series={`⟨*name of the series*⟩`}`. Therefore the field content will not be printed. At least BibTeX gives a warning in its log which can be checked.[9] For the following examples we use `@String` whenever it is clever and possible.

Lastly we want to point out that `@Strings` can also be used partly as following shows:

```
@Incollection{Mundt2015,
  ...
  location      = Berlin #{ and Boston}, %@String partly used
  ...
}
```

Each time you want to leave the `@String` environment and enter the curly bracket environment (and reverse) make use of a hash # to concatenate elements.

4 Details of optional preferences

Following we give a more detailed insight into the various options of `archaeologie` and show their results on the bases of concrete examples. Changes made by these options are coloured in red.

4.1 Preamble options

Optional preferences in the preamble are loaded within the package bibLaTeX:

```
\usepackage[%
    backend=biber,  % activates biber which is done by default anyway
                    % (but will give an error if not done here)
    style=archaeologie,    % loads the style archaeologie
    inreferences=true,     % option inreferences is loaded
    lstabbrv               % option lstabbrv is loaded as well
    ]{biblatex}
```

In this example the style `archaeologie` is loaded with options `inreferences` and `lstabbrv`. Now, manual entries don't appear in author-year-style anymore and journal/series

[9] For example something like "'journaltitle' in entry ⟨*entrykey*⟩ cannot be null, deleting it".

@string-macros are enabled. By the way, it doesn't matter if you write inreferences or inreferences=true.

Each of the listed options is disabled by default even if we strongly recommend to use in particular the additional bibliographies and @string lists. All remaining options are rather a matter of taste.

Despite to the overview section (section 3) the following list is arranged in alphabetic order.

4.1.1 bibancient

bibancient

In case of citing ancient authors and their works you can do it with common \cite-commands. Exclusively for this case we included a modification that respects the different citation of ancient authors and works. With the option bibancient you load an additional bibliography called bibliography-bibancient.bib in which we inserted almost 600 ancient authors and works with their abbreviation according to The New Pauly/Thesaurus Linguae Latinae. For the complete list of those see section 8. Using these pre-sets is recommended because it will guarantee a high level of consistency and minimize error-proneness.

You can cite the authors or works with their bibtex-key which you find in bold in the left column of the list. Authors and works are separated in the bibtex-key by a colon. The entry on the right marks the shorthand which will be printed in your paper.

Let us make it clear with an example: With the loaded option bibancient you write

```
\cite[3,2,5--7]{Apul:met}
```

and will get in return after compiling:

Apul. met. 3,2,5–7.

The corresponding bibliography-entry looks like this

```
@Book{Apul:met,
  author      = {Apuleius Madaurensis, Lucius},
  title       = {metamorphoses},
  shorthand   = {Apul. met.},
  shortauthor = {Apuleius},
  keywords    = {ancient},
  options     = {ancient},
}
```

Example 4.1 – @Book{Apul:met,...}

All entries in the mentioned additional bibliography contain the line keywords = {ancient}. With that you can print all ancient authors in a separated bibliography by typing:

```
\printbibliography[keyword=ancient]
```

4.1 Apul. met. L. Apuleius Madaurensis, metamorphoses

By means of the bibtexkey (e.g. Apul:met) you can also cite only authors or titles like this:

```
\citeauthor{Apul:met} remarks in \citetitle{Apul:met}...
```

will give

> Apuleius remarks in *metamorphoses*...

4.1.2 bibcorpora

bibcorpora

This loads an additional bibliography which contains the most important corpora for ancient studies, so you can cite them right away in your document without creating a new bibentry by yourself. These corpora are listed in section 9. Advantage and usage mostly correspond to bibancient, so have a look at section 4.1.1 for details.

4.1.3 inreferences

inreferences

One peculiarity of citation rules of the German Archaeological Institute is the way manuals and encyclopaedias should be cited when not represented in author-year-style. archaeologie allows to cite these manuals in footnotes or text as full citation in this special manner. Single requirement is that the bibliography entry is an @Inreference (cf. section 5.7).

An example makes it clear:

```
@Inreference{Nieddu1995,
  author    = {Nieddu, Giuseppe},
  title     = {Dei Consentes},
  booktitle = LTUR-short,
  pages     = {9--10},
  year      = {1995},
  volume    = {2},
}
```

Example 4.2 – @Inreference{Nieddu1995,...}

There are two ways to display \cite{Nieddu1995}:

> (a) by default it prints author-year: Nieddu 1995
>
> (b) with the option inreferences it will change to: LTUR 2 (1995) 9-10 s. v. Dei Consentes (G. Nieddu)

If [⟨*postnote*⟩] is defined with columns/page number, e. g. \cite[9]{Nieddu1995}, the position of [⟨*postnote*⟩] changes:

> (a) by default it prints in author-year: Nieddu 1995, 9
>
> (b) with the option inreferences it appears like: LTUR 2 (1995) 9 s. v. Dei Consentes (G. Nieddu)

To mention an important point, activating inreferences causes the cited @Inreference entry to be automatically *omitted* in the (final) bibliography, because the entry is fully cited before in the footnotes (also stated in the German Archaeological Institute rules).

If the option is not used (inreferences=false) the entry will look like this in the bibliography:

[4.5 Nieddu 1995 LTUR 2 (1995) 9–10 s. v. Dei Consentes (G. Nieddu)]

4.1.4 lstabbrv

lstabbrv

If you want to benefit from the above mentioned method with @String (cf. section 3.4) you have to activate the option called lstabbrv (list of abbreviations) in the preamble. Once activated the additional bibliography archaeologie-lstabbrv.bib is loaded. In this bibliography all abbreviations listed in section 12 are stored, for further details of usage see section 3.4.

4.1.5 lstlocations

lstlocations

This loads an additional bibliography with @Strings of locations used to print out their correct exonym in the selected language. In that case you are not forced to change location spelling when switching the language. (Otherwise it is necessary to adjust location names like *Rome* to *Rom* or *Roma* in your potentially multiple-used bibliography each time you change the language of your scientific text). For details on the locations list cf. section 10.

4.1.6 lstpublishers

lstpublishers

Activates the additional bibliography file archaeologie-lstpublishers.bib with @Strings of publishers which can be used to print out their correct name. Benefits are similar to the other lists mentioned above and in section 3.4. For the list cf. section 11

4.1.7 seenote

seenote

Even if author-year-citation seems to be commonly accepted in Ancient Studies in the meantime you may want to use a traditional citation style. For this purpose you can switch to the other allowed citation rule by the German Archaeological Institute which works like this: If you cite a work for the first time in a footnote archaeologie will print a full cite which contains all bibliography elements. Henceforward each following citation is printed as short cite and will additionally refer to the footnote where the first cite was done. Bibliography entries with options={ancient} are excluded form this speciality and are cited as always.

You can use the cite-commands \cite(s) and \parencite(s) but \textcite(s) will behave like \cite(s) because seenote actually just checks for occurrences in footnotes and does not refer to cites in running text.

We give an example, first citation of

```
\footnote{\cite{Ball2013}}
```

displays

> L. F. Ball – J. J. Dobbins, Pompeii Forum Project. Current thinking on the Pompeii Forum, 117/3, 2013, 461–492.

Second citation of

```
\footnote{\cite[470]{Ball2013}}
```

ends up in

> Ball – Dobbins loc. cit. (see n. [number of the footnote with full citation]) 470.

4.1.8 translation

translation

Once this option is activated the original title, the original language and the translator of the work are printed (origtitle, origlanguage, translator). For ancient texts and fragments (options={ancient} or options={frgancient}) this is default, so they will always be printed with original title, language and translator.

An example will be clarifying. The bibliographical entry Lefebvre2011 contains following fields:

```
@Book{Lefebvre2011,
  author       = {Lefebvre,Henri},
  title        = {The Production of Space},
  publisher    = {Blackwell Publishing Ltd},
  location     = {Maien, MA and Oxford and Victoria},
  year         = {2011},
  edition      = {30},
  origlocation = {Oxford},
  origyear     = {1991},
  origtitle    = {La production de 'lespace},
  origlanguage = {french},
  translator   = {Donald Nicholson-Smith},
}
```

Example 4.3 – @Book{Lefebvre2011,...}

The bibliography result is:

> [4.3] Lefebvre 2011 H. Lefebvre, The Production of Space [30](Oxford 1991; repr. Maien, MA 2011)

By activating option translation it will change to:

> [4.3] Lefebvre 2011 H. Lefebvre, The Production of Space, La production de l'espace, trans. from French by D. Nicholson-Smith [30](Oxford 1991; repr. Maien, MA 2011)

However, it works not only with entries like @Book but also with e. g. @Article:

```
@Article{Lefebvre1977,
  author       = {Lefebvre, Henri},
  title        = {Die Produktion des städtischen Raums},
  journaltitle = {ARCH+},
  volume       = {34},
  pages        = {52--57},
  year         = {1977},
  translator   = {Franz Hiss and Hans-Ulrich Wegener},
  origlanguage = {french},
  number       = {9},
  origtitle    = {Introduction à l'espace urbain},
}
```

Example 4.4 – @Article{Lefebvre1977,...}

Once again the bibliography entry alters:

4.4 Lefebvre 1977 H. Lefebvre, Die Produktion des stätischen Raums, *Introduction à l'espace urbain*, trans. from French by F. Hiss – H.-U. Wegener, ARCH+ 34/9, 1977, 52–57

4.1.9 inreferences

inreferences

There is the possibility to cite inreferences in the footnote as a full citation. It is only required that the bibliography-entry is an @Inreference (cf. section 5.7).

Another example makes it clear:

```
@Inreference{Nieddu1995,
  author    = {Nieddu, Giuseppe},
  title     = {Dei Consentes},
  booktitle = LTUR-short,
  pages     = {9--10},
  year      = {1995},
  volume    = {2},
}
```

Example 4.5 – @Inreference{Nieddu1995,...}

There are two ways of the display of \cite{Nieddu1995}:

(a) by default it will give: Nieddu 1995

(b) with the option inreferences it will change to: LTUR 2 (1995) 9-10 s. v. Dei Consentes (G. Nieddu)

If the [⟨*postnote*⟩] is defined with the columns/page number, (e. g. \cite[9]{Nieddu1995}), then it will change the position for the [⟨*postnote*⟩]:

(a) by default it will give: Nieddu 1995, 9

(b) with the option inreferences it will change to: LTUR 2 (1995) 9 s. v. Dei Consentes (G. Nieddu)

With the activated option (inreferences) the cited entries which are defined as a @Inreference will be automatically omitted in the (final) bibliography, because the entries are fully cited before in the footnotes.

If the option is not used (=false) the entry will look like this in the bibliography:

4.5 Nieddu 1995 LTUR 2 (1995) 9–10 s. v. Dei Consentes (G. Nieddu)

4.1.10 yearseries

yearseries

The option yearseries leads to a different position of the fields series and number. The series of a @Book or @Collection is now printed *after* the year. An example with an @Incollection demonstrates the effect of this option:

```
@Incollection{Mundt2015,
  author       = {Mundt, Felix},
  title        = {Der Mensch, das Licht und die Stadt},
  subtitle     = {Rhetorische Theorie und Praxis antiker und
    humanistischer Städtebeschreibung},
  pages        = {179--206},
  editor       = {Therese Fuhrer and Felix Mundt and Jan Stenger},
  booktitle    = {Cityscaping},
  booksubtitle = {Constructing and Modelling Images of the City},
  publisher    = WdG,
  location     = Berlin #{ and Boston}, %@String partly used
  year         = {2015},
  series       = Philologus-long #{ Supplement},
  number       = {3},
  shortseries  = Philologus-short #{ Suppl.},
}
```

Example 4.6 – @Incollection{Mundt2015,...}

Without any option activated it will look like this:

4.6 Mundt 2015 F. Mundt, Der Mensch, das Licht und die Stadt. Rhetorische Theorie und Praxis antiker und humanistischer Städtebeschreibung, in: T. Fuhrer – F. Mundt – J. Stenger (ed.), Cityscaping. Constructing and Modelling Images of the City, Philologus Suppl. 3 (Berlin 2015) 179–206

By activating yearseries it will change to:

4.6 Mundt 2015 F. Mundt, Der Mensch, das Licht und die Stadt. Rhetorische Theorie und Praxis antiker und humanistischer Städtebeschreibung, in: T. Fuhrer – F. Mundt – J. Stenger (ed.), Cityscaping. Constructing and Modelling Images of the City (Berlin 2015) Philologus Suppl. 3, 179–206

4.1.11 fullnames / lastnames

fullnames
lastnames

Every time you mention authors in the running text it is possible to cite them directly with their names (\citeauthor{⟨*bibtex-key*⟩}) or their works (\citetitle{⟨*bibtex-key*⟩}) having the benefit that they will be linked to your bibliography (cf. section 3.3).

By default the author's name is printed with abbreviated first name[10] and last name. If you prefer to have full names printed (in running text, not in the bibliography!) switch

[10] Usually only the first letter, but setting the option initials to true it might change (cf. section 4.1.20).

on the option fullnames. If you want in contrast the authors to be shorten to their last names use lastnames.

The following example illustrates it:

```
@Article{Boehmer1985,
  author       = {Boehmer, Rainer Michael and Wrede, Nadja},
  title        = {Astragalspiele in und um Warka},
  journaltitle = BaM,
  shortjournal = BaM-short,
  volume       = {16},
  pages        = {399--404},
  year         = {1985},
}
```

Example 4.7 – @Article{Boehmer1985,...}

Let's assume you would like to write:

```
..., this is also shown by \citeauthor{Boehmer1985}
 in their latest article \citetitle{Boehmer1985}.
```

After compiling it will look by default like this using the etting fullnames (a) or lastnames (b):

(a) ..., this is also shown by Rainer Michael Boehmer und Nadja Wrede in their latest article *Astragalspiele in und um Warka* (1985).

(b) ..., this is also shown by Boehmer und Wrede in their latest article *Astragalspiele in und um Warka* (1985).

4.7 Boehmer – Wrede 1985 R. M. Boehmer – N. Wrede, Astragalspiele in und um Warka, BaM 16, 1985, 399–404

Two things are left to be noticed:

(a) Citing an author in a footnote prints always last names, no matter which citing option is chosen.

(b) There is a slightly different behaviour if you use \citeauthor or \citetitle with ancient authors and work titles (options={ancient}). Instead of printing the field author which contains usually the full ancient name the field shortauthor is considered in which you can record the more common name of the ancient author. Ancient work titles will be printed without the year in parentheses. Both is demonstrated in the following example: Based on the bibliography entry

```
@Book{Quint:inst,
  author       = {Fabius Quintilianus, Marcus},
  title        = {Ausbildung des Redners},
  subtitle     = {Institutio oratoria},
  publisher    = WBG,
  location     = {Darmstadt},
  year         = {2015},
  edition      = {6},
  origlanguage = {latin},
```

```
  translator   = {Rahn, Helmut},
  shorthand    = {Quint. inst.},
  shortauthor  = {Quintilian},
  keywords     = {ancient},
  options      = {ancient},
}
```

Example 4.8 – @Book{Quint:inst,...}

and the following statement

```
... and \citeauthor{Quint:inst} names in \citetitle{Quint:inst}
 the necessary physical qualities of an orator, too.
```

we obtain the result:

> ... and Quintilian names in *Ausbildung des Redners* the necessary physical qualities of an orator, too.

> **4.8** Quint. inst. M. Fabius Quintilianus, Ausbildung des Redners. Institutio oratoria, trans. from Latin by H. Rahn [6](Darmstadt 2015)

4.1.12 yearinparens

yearinparens

As the options name evokes the publication year of the cited entries (year or year from date) will be put in parentheses, in footnotes as well as in the bibliography. The ›Klammerregel‹ (correct alternation of different brackets) will be respected.

In the case of \cite[475]{Ball2013}, instead of

> Ball – Dobbins 2013, 475

now we get

> Ball – Dobbins (2013), 475.

4.1.13 scshape

scshape

You can also change the look of your citations. With scshape author names are set to small capitals—in footnotes and in the bibliography.

Entries without author or editor setting but with a defined label (section 7.4) are excluded from this option because label is not an author name but a self-defined expression with varying purposes. Further excluded are ancient authors (options={ancient} or options={frgancient}).

By default—to quote the just established example \cite[475]{Ball2013}—we have again

Ball – Dobbins 2013, 475

But with schape it will turn into:

Ball – Dobbins 2013, 475

And since the entry looks like this

```
@Article{Ball2013,
author       = {Larry F. Ball and John J. Dobbins},
title        = {Pompeii Forum Project},
subtitle     = {Current Thinking on the Pompeii Forum},
journaltitle = AJA,
shortjournal = AJA-short,
volume       = {117},
pages        = {461--492},
year         = {2013},
doi          = {10.3764/aja.117.3.0461},
eprint       = {10.3764/aja.117.3.0461},
eprinttype   = {jstor},
month        = {July},
number       = {3},
}
```

Example 4.9 – @Article{Ball2013,...}

the output in the bibliography changes from:

4.9 Ball – Dobbins 2013 L. F. Ball – J. J. Dobbins, Pompeii Forum Project. Current Thinking on the Pompeii Forum, AJA 117/3, 2013, 461–492, DOI: 10.3764/aja.117.3.0461, JSTOR: 10.3764/aja.117.3.0461

to

4.9 Ball – Dobbins 2013 L. F. Ball – J. J. Dobbins, Pompeii Forum Project. Current Thinking on the Pompeii Forum, AJA 117/3, 2013, 461–492 ...

4.1.14 bibfullname

bibfullname This will show the full name of an author and/or editor in the bibliography. By default first names are abbreviated.

Without any options the entry

```
@Article{Osland2016,
  author       = {Osland, Daniel},
  title        = {Abuse or Reuse?},
  subtitle     = {Public Space in Late Antique Emerita},
```

```
  journaltitle = AJA,
  shortjournal = AJA-short,
  volume       = {120},
  pages        = {67--97},
  year         = {2016},
  jstor        = {10.3764/aja.120.1.0067},
  number       = {1},
  zenon        = {001454110},
}
```

Example 4.10 – @Article{Osland2016,...}

looks like

4.10 Osland 2016 D. Osland, Abuse or Reuse? Public Space in Late Antique Emerita, AJA 120/1, 2016, 67–97,
JSTOR: 10.3764/aja.120.1.0067,
ZENON (OPAC): 001454110

and with bibfullname it will change to:

4.10 Osland 2016 Daniel Osland, Abuse or Reuse? Public Space in Late Antique Emerita, AJA 120/ 1, 2016, 67–97,
...

4.1.15 noabbrv

noabbrv

According to the guidelines of the German Archaeological Institute journal titles and series have to be abbreviated. Therefore the fields shortjournal or shortseries will be considered. If you like to have printed full names of journals and series instead you can switch on the option noabbrv. For an example see section 3.4 and example 3.1.

4.1.16 publisher

publisher

Once activated all locations and the publisher are printed. This will lead to a different output of the edition which will be right in front of the year. In case of reprint or second edition the first edition origyear will be put in square brackets after the year.

```
@Book{Emme2013,
  author    = {Burkhard Emme},
  title     = {Peristyl und Polis},
  subtitle  = {Entwicklung und Funktionen öffentlicher griechischer
    Hofanlagen},
  publisher = WdG,
  location  = Berlin #{ and New York}, %@String partly used
  year      = {2013},
  series    = {Urban Spaces},
  number    = {1},
}
```

Example 4.11 – @Book{Emme2013,...}

Default settings produce:

4.11 Emme 2013 B. Emme, Peristyl und Polis. Entwicklung und Funktionen öffentlicher griechischer Hofanlagen, Urban Spaces 1 (Berlin 2013)

By activating option publisher you obtain:

4.11 Emme 2013 B. Emme, Peristyl und Polis. Entwicklung und Funktionen öffentlicher griechischer Hofanlagen, Urban Spaces 1 (Berlin – New York: Walter de Gruyter 2013)

And here a more detailed example with origlocation, origyear and origpublisher:

```
@Book{Neufert2002,
  author        = {Neufert, Ernst},
  editor        = {Neufert, Peter and Neufert, Cornelius and Neff, Ludwig
    and Franken, Corinna},
  title         = {Bauentwurfslehre},
  subtitle      = {Grundlagen, Normen, Vorschriften ...},
  publisher     = VT, %@String used
  origpublisher = {Mann},
  location      = {Wiesbaden},
  year          = {2002},
  edition       = {37},
  origlocation  = Berlin, %@String used
  origyear      = {1936},
}
```

Example 4.12 – @Book{Neufert2002,...}

4.12 Neufert 2002 E. Neufert, Bauentwurfslehre. Grundlagen, Normen, Vorschriften ... Ed. by P. Neufert – C. Neufert – L. Neff – C. Franken [37](Berlin 1936; repr. Wiesbaden 2002)

4.12 Neufert 2002 E. Neufert, Bauentwurfslehre. Grundlagen, Normen, Vorschriften ... Ed. by P. Neufert – C. Neufert – L. Neff – C. Franken (Wiesbaden: Vieweg [3]2002 [Berlin: Mann 1936])

4.1.17 edby

edby This option gives you a different output and position of editors: Instead of embedding ›(ed.)‹/›(Hrsg.)‹ right after the editor name it places the adjunct ›ed. by‹/›hrsg. v.‹ behind the editor. Furthermore, in case of @Incollections and @Inproceedings editor names and book title switch their positions as it is shown below.

```
@Inproceedings{Wulf-Rheidt2013,
  author        = {Wulf-Rheidt, Ulrike},
  title         = {Der Palast auf dem Palatin -- Zentrum im Zentrum},
  subtitle      = {Geplanter Herrschersitz oder Produkt eines langen
    Entwicklungsprozesses?},
  pages         = {277--289},
  editor        = {Dally, Ortwin and Fless, Friederike and Haensch, Rudolf
    and Pirson, Felix and Sievers, Susanne},
  booktitle     = {Politische Räume in vormodernen Gesellschaften},
```

```
  booksubtitle = {Gestaltung – Wahrnehmung – Funktion},
  location     = {Rahden/Westf\adddot},
  publisher    = VML,   %@String used
  year         = {2013},
  venue        = Berlin,  %@String used
  eventdate    = {2009-11-18/2009-11-22},
  eventtitle   = {Internationale Tagung des DAI und des DFG-
    Exzellenzclusters TOPOI},
  zenon        = {001371402},
  number       = {6},
  series       = MKT,   %@String used
  shortseries  = MKT-short, %@String used
}
```

Example 4.13 – @Inproceedings{Wulf-Rheidt2013,...}

Without option edby this @Inproceedings would look like:

4.13 Wulf-Rheidt 2013 U. Wulf-Rheidt, Der Palast auf dem Palatin – Zentrum im Zentrum. Geplanter Herrschersitz oder Produkt eines langen Entwicklungsprozesses?, in: O. Dally – F. Fless – R. Haensch – F. Pirson – S. Sievers (ed.), Politische Räume in vormodernen Gesellschaften. Gestaltung – Wahrnehmung – Funktion. Internationale Tagung des DAI und des DFG-Exzellenzclusters TOPOI Berlin November 18–22, 2009, MKT 6 (Rahden/Westf. 2013) 277–289, ZENON (OPAC): 001371402

But activating edby it changes to:

4.13 Wulf-Rheidt 2013 U. Wulf-Rheidt, Der Palast auf dem Palatin – Zentrum im Zentrum. Geplanter Herrschersitz oder Produkt eines langen Entwicklungsprozesses?, in: Politische Räume in vormodernen Gesellschaften. Gestaltung – Wahrnehmung – Funktion, ed. by O. Dally – F. Fless – R. Haensch – F. Pirson – S. Sievers. Internationale Tagung des DAI und des DFG-Exzellenzclusters TOPOI Berlin November 18–22, 2009, MKT 6 (Rahden/Westf. 2013) 277–289

4.1.18 width

width

width controls the width between label (which consists usually of author and year) and reference in the bibliography, pre-defined as 4em. If you wish to have it bigger or smaller you can change it to every length you would like to have:

width = ⟨*length*⟩

⟨*length*⟩ stands for the length you want (e. g. 3em, 7pt or 4cm), you can even do -1em; then there is no indent at all.

4.1.19 counter

counter

If you like to know how many times you cited an author or work then use this option called counter.[11] Depending on the language you chose in the preamble of your document the information will be given in German (ngerman) or in English (if not ngerman).

[11] The idea is based on tex.stackexchange.com/a/14159/98739 and has been modified.

[5.2] Böhm – Eickstedt 2001 S. Böhm – K.-V. v. Eickstedt (Hrsg.), Ithake. Festschrift Jörg Schäfer (Würzburg 2001) | WURDE 1-MAL ZITIERT.

If there has been no citation in the text (but maybe a \citeauthor or \citetitle):

[5.2] Böhm – Eickstedt 2001 S. Böhm – K.-V. v. Eickstedt (Hrsg.), Ithake. Festschrift Jörg Schäfer (Würzburg 2001) | WURDE KEINMAL ZITIERT.

For all languages besides German:

[5.2] Böhm – Eickstedt 2001 S. Böhm – K.-V. v. Eickstedt (ed.), Ithake. Festschrift Jörg Schäfer (Würzburg 2001) | CITED NOT ONCE.

If there has been only one citation:

[5.2] Böhm – Eickstedt 2001 S. Böhm – K.-V. v. Eickstedt (ed.), Ithake. Festschrift Jörg Schäfer (Würzburg 2001) | CITED 1 TIME.

If there has been more than one citations:

[5.2] Böhm – Eickstedt 2001 S. Böhm – K.-V. v. Eickstedt (ed.), Ithake. Festschrift Jörg Schäfer (Würzburg 2001) | CITED 3 TIMES.

Note that biblatex provides a related option backref which lists per reference every page that contains the cited reference. But having a different goal that option doesn't support counts.

4.1.20 initials

counter First names are abbreviated keeping digraphs and trigraphs instead of simple first letter initials.[12]

4.2 Bibliography entry options

4.2.1 ancient

ancient This option was found in an excellent bibLaTeX-style called geschichtsfrkl (v.1.1 by Jonathan Zachhuber), so after some modifications we adopted and included it into archaeologie.

If you intend to cite ancient authors we strongly recommend this option to you because it enables you to cite ancient texts in the style archaeologists and historians are used to *plus* to get entirely supported bibliography referencing.

Let us have a look at an example:

[12] Option was included from tex.stackexchange.com/a/295486/98739

```
@Book{Cic:Att,
  author       = {Tullius Cicero, Marcus},
  editor       = {Kasten, Helmut},
  title        = {Atticus-Briefe},
  publisher    = AW,  %@String used
  location     = {Düsseldorf and Zürich},
  year         = {1980},
  series       = {Tusculum Bücherei},
  edition      = {3},
  origyear     = {1959},
  origtitle    = {epistulae ad Atticum},
  origlanguage = {latin},
  translator   = {Kasten, Helmut},
  shorthand    = {Cic. Att.},
  shortauthor  = {Cicero},
  keywords     = {ancient},
  options      = {ancient}, %!!
}
```

Example 4.14 – @Book{Cic:Att,...}

Instead of applying author and year as label the option ancient takes the field shorthand into account.

So you write in your text

```
\cite[1, 3,3]{Cic:Att}
```

and it will be printed as

> Cic. Att. 1, 3,3

Equally the field shorthand is used as label in the bibliography instead of an author-year label:

4.14 Cic. Att. M. Tullius Cicero, Atticus-Briefe, *epistulae ad Atticum*, ed. and trans. from Latin by H. Kasten, Tusculum Bücherei [3](Düsseldorf 1959; repr. Düsseldorf 1980)

Take notice how options={ancient} treats editor and translator in this example. While the ancient author is mentioned first, translator and editor are put behind the title, in this case even united due to fact that editor and translator are identical.

This works not only with @Book but also with those ancient texts which are part of an @Incollection employing them similarly to the entries defined as @Book.

Another example:

```
@Inbook{Cic:Sest,
  author       = {Tullius Cicero, Marcus},
  title        = {Rede für P.\ Sestius},
  booktitle    = {Die politischen Reden},
  year         = {1993},
  editor       = {Fuhrmann, Manfred},
  volume       = {II},
  publisher    = AW,    %@String used
```

```
  pages        = {110--185},
  origlanguage = {latin},
  series       = {Sammlung Tusculum},
  location     = Munich,      %@String used
  intranslator = {Fuhrmann, Manfred},
  keywords     = {ancient},
  options      = {ancient},
  origtitle    = {pro P. Sestio},
  shortauthor  = {Cicero},
  shorthand    = {Cic. Sest.},
}
```

Example 4.15 – @Inbook{Cic:Sest,...}

Even support for several languages is taken into account as this bibliography entries show:

English:	Cic. Sest.	M. Tullius Cicero, Rede für P. Sestius, *pro P. Sestio*, trans. from Latin by M. Fuhrmann, in: M. Fuhrmann (ed.), Die politischen Reden II, Sammlung Tusculum (Munich 1993) 110–185
German:	Cic. Sest.	M. Tullius Cicero, Rede für P. Sestius, *pro P. Sestio*, aus dem Lateinischen übers. von M. Fuhrmann, in: M. Fuhrmann (Hrsg.), Die politischen Reden II, Sammlung Tusculum (München 1993) 110–185
Italian:	Cic. Sest.	M. Tullius Cicero, Rede für P. Sestius, *pro P. Sestio*, trad. dal latino da M. Fuhrmann, in: M. Fuhrmann (cur.), Die politischen Reden II, Sammlung Tusculum (Monaco [di Bavaria] 1993) 110–185
French:	Cic. Sest.	M. Tullius Cicero, Rede für P. Sestius, *pro P. Sestio*, trad. depuis le latin par M. Fuhrmann, in : M. Fuhrmann (éd.), Die politischen Reden II, Sammlung Tusculum (Munich 1993) 110–185
Spanish:	Cic. Sest.	M. Tullius Cicero, Rede für P. Sestius, *pro P. Sestio*, trad.del latín por M. Fuhrmann, en: M. Fuhrmann (ed.), Die politischen Reden II, Sammlung Tusculum (Múnich 1993) 110-185

4.2.2 frgancient

frgancient

When dealing with fragments of ancient texts often the edition respective the editor is important to cite. If you want to cite such a collection of fragments use options={frgancient}. In this case the editor (shorteditor or editor) will be put in after the {⟨*postnote*⟩}.

```
@Book{Fest,
  author      = {Pompeius Festus, {\relax Sex}tus},
  editor      = {Lindsay, Wallace Martin},
  title       = {De verborum significatu quae supersunt cum Pauli epitome
    },
  publisher   = {Teubner},
  location    = Leipzig,    %@String used
  year        = {1965},
  series      = {Bibliotheca scriptorum et Grecorum et Romanorum
    Teubnerina},
  origyear    = {1913},
  shorthand   = {Fest.},
  shortauthor = {Festus},
  keywords    = {ancient},
  options     = {frgancient},
  shorteditor = {L},
```

```
}
```

Example 4.16 – @Book{Fest,...}

When you cite this entry in this example with `\cite[3]{Fest}` the field `shorteditor` will be shown.

Fest. 3 L

In the bibliography the reference differentiates slightly from `options = {ancient}` because of the missing ancient author of fragment collections, so the editors name is printed in the first place:

4.16 Fest. W. M. Lindsay (ed.), De verborum significatu quae supersunt cum Pauli epitome, Bibliotheca scriptorum et Graecorum et Romanorum Teubneriana (Leipzig 1913; repr. Leipzig 1965)

4.2.3 corpus

corpus

There are some corpora (e. g. inscriptions, minted coins, vases, etc.) which are usually cited with a common abbreviation. Those abbreviations are typed in in the field `shorthand`. To cite such a corpus with its abbreviation you have to write an additional `options={corpus}` in the bibliographical entry. Now you can cite it as usual with [⟨*prenote*⟩] or [⟨*postnote*⟩] you like to have.

This example shows the behaviour with a corpus that is common for Latin epigraphy:

```
@Book{CIL,
  title     = CIL, %@String used
  location  = Berlin, %@String used
  year      = {1863--},
  shorthand = CIL-short,  %@String used
  keywords  = {corpus}, %!
  options   = {corpus},
}
```

Example 4.17 – @Book{CIL,...}

It will be cited with:

```
\cite[06, 01234]{CIL}.
```

And the result is:

CIL 06, 01234

The field `shorthand` will be used for bibliography reference, where it is listed as label.

4.17 CIL Corpus inscriptionum Latinarum (Berlin)

If you also set something like `keywords={corpus}` then you can make a separate bibliography with all the copora cf. section 6.

5 Examples of entry types

The style archaeologie defines several so-called bibliographical drivers, which allow to cite different kind of works. Below we describe how they are working and which fields you should fill out. For the examples we don't use any further options which are described above.

5.1 Type @Book

@Book
@Collection

Let's start with an easy example: a book or a collection (both are treated equally). You can use the following fields:

mandatory: author/editor, title, subtitle, titleaddon, location, year,

optional: maintitle, mainsubtitle, maintitleaddon, volume, publisher, series, number, edition, origyear, origlocation, origpublisher, translator, originguage, related, relatedtype, doi, url, urldate, eprint, eprinttype, note, pubstate,

An entry of a book might look as this in your bib-file:

```
@Book{Mann2011,
  author    = {Mann, Christian},
  title     = {\enquote{Um keinen Kranz, um das Leben kämpfen wir!}},
  subtitle  = {Gladiatoren im Osten des Römischen Reiches und die Frage
    der Romanisierung},
  publisher = {Verlag Antike},
  location  = Berlin,   %@String used
  year      = {2011},
  series    = {Studien zur Alten Geschichte},
  number    = {14},
}
```

Example 5.1 – @Book{Mann2011,...}

A citation in a footnote is done with

```
\footnote{\cite[Vgl.][142--144]{Mann2011}.}
```

and it looks like this in footnotes[13] and like this in the bibliography.

5.1 Mann 2011 C. Mann, "Um keinen Kranz, um das Leben kämpfen wir!" Gladiatoren im Osten des Römischen Reiches und die Frage der Romanisierung, Studien zur Alten Geschichte 14 (Berlin 2011)

5.1.1 ›Festschrift‹, commemorative volume, catalogue, etc.

To mark that the book or collection is a so-called ›Festschrift‹/ commemorative volume, or an exhibition or auction catalogue you need an additional note to make it clear. We suggest to use the field titleaddon or if it is a @Incollection or @Inproceedings you can use the field booktitleaddon (for papers in collections see section 5.2).

13 Vgl. Mann 2011, 142–144.

```
@Book{Boehm2001,
  editor     = {Böhm, Stephanie and Eickstedt, Klaus-Valtin von},
  title      = {Ithake},
  publisher  = {Ergon-Verlag},
  location   = {Würzburg},
  year       = {2001},
  titleaddon = {Festschrift Jörg Schäfer},
}
```

Example 5.2 – @Book{Boehm2001,...}

5.2 Böhm – Eickstedt 2001 S. Böhm – K.-V. v. Eickstedt (ed.), Ithake. Festschrift Jörg Schäfer (Würzburg 2001)

5.1.2 Translated book

If you cite a translated book you can link it to the original book and let display the translator as well as the original language. To obtain this fill the fields related and relatedtype (for further information see the informations about reviews in section 5.8).

It will be more clear with this example: The first edition of *Augustus und die Macht der Bilder* by Zanker has been published in 1987 (origyear), but by now it has been released in its 5th edition.

```
@Book{Zanker2009,
  author        = {Zanker, Paul},
  title         = {Augustus und die Macht der Bilder},
  publisher     = CHB,  %@String used
  location      = Munich, %@String used
  year          = {2009},
  edition       = {5},
  origlocation  = Leipzig, %@String used
  origyear      = {1987},
  eprint        = {000250713},
  eprinttype    = {zenon},
  language      = {german},
  origpublisher = {Koehler \& Amelang},
}
```

Example 5.3 – @Book{Zanker2009,...}

In 1988, one year later after the first edition (origyear) the book has been translated by A. H. Shapiro:

```
@Book{Zanker1988,
  author      = {Zanker, Paul},
  title       = {The Power of Images in the Age of Augustus},
  publisher   = UMP,    %@String used
  location    = {Ann Arbor},
  year        = {1988},
  series      = {Jerome Lectures},
  number      = {16},
  translator  = {Shapiro, Alan H.},
  language    = {english},
  related     = {Zanker2009},
```

```
  relatedtype = {translationof},
}
```

Example 5.4 – @Book{Zanker1988,...}

The translated book Zanker1988 is connected with the book Zanker2009 via the field related = {⟨*bibtex-key*⟩} and the relation got specified with the field relatedtype, in this case it is a translation so ={translationof}.

You don't have to cite Zanker2009 to have the information visible in the bibliography. It will be included automatically. For the following bibliography we only use \cite{Zanker1988}:

English:	Zanker 1988	P. Zanker, The Power of Images in the Age of Augustus, Jerome Lectures 16 (Ann Arbor 1988), trans. of *Augustus und die Macht der Bilder* [5](Leipzig 1987; repr. Munich 2009), trans. by A. H. Shapiro
German:	Zanker 1988	P. Zanker, The Power of Images in the Age of Augustus, Jerome Lectures 16 (Ann Arbor 1988), trans. of *Augustus und die Macht der Bilder* [5](Leipzig 1987; Nachdr. München 2009), übers. von A. H. Shapiro
Italian:	Zanker 1988	P. Zanker, The Power of Images in the Age of Augustus, Jerome Lectures 16 (Ann Arbor 1988), trans. of *Augustus und die Macht der Bilder* [5](Lipsia 1987; rist. Monaco [di Bavaria] 2009), trad. da A. H. Shapiro
French:	Zanker 1988	P. Zanker, The Power of Images in the Age of Augustus, Jerome Lectures 16 (Ann Arbor 1988), trans. of *Augustus und die Macht der Bilder* [5](Leipzig 1987 ; réimpr. Munich 2009), trad. par A. H. Shapiro
Spanish:	Zanker 1988	P. Zanker, The Power of Images in the Age of Augustus, Jerome Lectures 16 (Ann Arbor 1988), trans. of *Augustus und die Macht der Bilder* [5](Leipzig 1987; reimp. Múnich 2009), trad. por A. H. Shapiro

5.4

5.1.3 Multiple volumes of a monograph

There is the case that you have to cite a book which consists of several volumes, usually there is a volume with text and one volume with plates. To cite particularly e. g. the second volume you can do the following. Let's assume this is the bibliography entry:

```
@Book{MacDonald1986,
  author    = {MacDonald, William L.},
  title     = {An urban Appraisal},
  publisher = YUP,    %@String used
  location  = {New Haven and }# London, %@String used
  year      = {1986},
  maintitle = {The Architecture of the Roman Empire},
  volume    = {II},
  series    = {Yale Publications in the History of Art},
  number    = {35},
}
```

Example 5.5 – @Book{MacDonald1986,...}

In the bibliography the main title of the monograph (maintitle) and the title of the book (title) are shown separately so the volume (volume) appears before the title of the book

MacDonald 1986	W. L. MacDonald, The Architecture of the Roman Empire II. An urban Appraisal, Yale Publications in the History of Art 35 (New Haven 1986)

5.5

5.2 Type @Inbook / @Incollection

@Incollection
@Inbook

Single entries/chapters of a collection are cited best when they are set up as @Incollection or @Inbook.

mandatory: author, title, subtitle, titleaddon, editor, booktitle, booksubtitle, booktitleaddon, location, year, pages,

optional: maintitle, mainsubtitle, maintitleaddon, volume, publisher, series, number, edition, origyear, origlocation, origpublisher, translator, origlanguage, related, relatedtype, doi, url, urldate, eprint, eprinttype, note, pubstate,

This following example should make it clear:

```
@Incollection{Carter2014,
  author    = {Carter, Michael J. and Edmondson, Jonathan},
  title     = {Spectacle in Rome, Italy, and the Provinces},
  pages     = {537--558},
  editor    = {Bruun, Christer and Edmondson, Jonathan},
  booktitle = {The Oxford Handbook of Roman Epigraphy},
  publisher = OUP,    %@String used
  location  = {Oxford},
  year      = {2014},
}
```

Example 5.6 – @Incollection{Carter2014,...}

[5.6] Carter – Edmondson 2014 M. J. Carter – J. Edmondson, Spectacle in Rome, Italy, and the Provinces, in: C. Bruun – J. Edmondson (ed.), The Oxford Handbook of Roman Epigraphy (Oxford 2014) 537–558

You can also have contributions to a ›Festschrift‹ etc. set up as @Incollection, but then notice the additional information in booktitleaddon.

```
@Incollection{Hoelscher2001,
  author         = {Hölscher, Tonio},
  title          = {Schatzhäuser -- Banketthäuser?},
  pages          = {143--152},
  editor         = {Böhm, Stephanie and Eickstedt, Klaus-Valtin von},
  booktitle      = {Ithake},
  publisher      = {Ergon-Verlag},
  location       = {Würzburg},
  year           = {2001},
  booktitleaddon = {Festschrift Jörg Schäfer},
}
```

Example 5.7 – @Incollection{Hoelscher2001,...}

In the bibliography it will look like:

[5.7] Hölscher 2001 T. Hölscher, Schatzhäuser – Banketthäuser?, in: S. Böhm – K.-V. v. Eickstedt (ed.), Ithake. Festschrift Jörg Schäfer (Würzburg 2001) 143–152

5.2.1 Short series

Some books or collections are part of a small series (not an ongoing series). This book is part of the series called abbreviated *MemAmAc*. Have a look:

```
@Incollection{Fentress2003,
  author       = {Fentress, Elizabeth and John Bodel and Adam Rabinowitz
    and Rabun Taylor},
  title        = {Cosa in the Republic and Early Empire},
  pages        = {13--62},
  editor       = {Fentress, Elizabeth},
  booktitle    = {An Intermittent Town},
  booksubtitle = {Excavations 1991--1997},
  publisher    = UMP,   %@String used
  location     = {Ann Arbor, Mich.},
  year         = {2003},
  volume       = {V},
  series       = MemAmAc,   %@String used
  number       = {2},
  maintitle    = {Cosa},
  shortseries  = MemAmAc-short,   %@String used
}
```

Example 5.8 – @Incollection{Fentress2003,...}

As we can see it is the fifth volume (volume) of the series with the main title *Cosa* (maintitle) but has an individual title (title) which is *Cosa in the Republic and Early Empire*, furthermore it is the second book (number) of the series *MemAmAc* (series).

Notice the different language-based behaviour of ›et. al.‹ for more than two authors/editors.

English:	Fentress et al. 2003	E. Fentress – J. Bodel – A. Rabinowitz – R. Taylor, Cosa in the Republic and Early Empire, in: E. Fentress (ed.), Cosa V. An Intermittent Town. Excavations 1991–1997, MemAmAc 2 (Ann Arbor, Mich. 2003) 13–62
German:	Fentress u. a. 2003	E. Fentress – J. Bodel – A. Rabinowitz – R. Taylor, Cosa in the Republic and Early Empire, in: E. Fentress (Hrsg.), Cosa V. An Intermittent Town. Excavations 1991–1997, MemAmAc 2 (Ann Arbor, Mich. 2003) 13–62
Italian:	Fentress et al. 2003	E. Fentress – J. Bodel – A. Rabinowitz – R. Taylor, Cosa in the Republic and Early Empire, in: E. Fentress (cur.), Cosa V. An Intermittent Town. Excavations 1991–1997, MemAmAc 2 (Ann Arbor, Mich. 2003) 13–62
French:	Fentress et al. 2003	E. Fentress – J. Bodel – A. Rabinowitz – R. Taylor, Cosa in the Republic and Early Empire, in : E. Fentress (éd.), Cosa V. An Intermittent Town. Excavations 1991–1997, MemAmAc 2 (Ann Arbor, Mich. 2003) 13–62
Spanish:	Fentress y col. 2003	E. Fentress – J. Bodel – A. Rabinowitz y R. Taylor, Cosa in the Republic and Early Empire, en: E. Fentress (ed.), Cosa V. An Intermittent Town. Excavations 1991–1997, MemAmAc 2 (Ann Arbor, Mich. 2003) 13-62

5.8

5.2.2 Inventory catalogue

The output of an inventory catalogue changes slightly compared to collections or sth. similar. The title is omitted and therefore there is no comma after the author's name.

We provide two examples so you see the difference.

```
@Inbook{Kohlmeyer1983,
  author       = {K. Kohlmeyer},
  booktitle    = {Tierbilder aus vier Jahrtausenden},
  year         = {1983},
  editor       = {U. Gehrig},
  booksubtitle = {Antiken der Sammlung Mildenberg},
  pages        = {20 Nr. 9},
  location     = Mainz, %@String used
}
```

Example 5.9 – @Inbook{Kohlmeyer1983,...}

and the second example

```
@Inbook{Parlasca1969,
  author    = {K. Parlasca},
  booktitle = {Helbig},
  year      = {1969},
  volume    = {III},
  edition   = {4},
  pages     = {98\psq\ Nr. 2176},
  location  = Tuebingen, %@String used
}
```

Example 5.10 – @Inbook{Parlasca1969,...}

5.9 Kohlmeyer 1983 K. Kohlmeyer in: U. Gehrig (ed.), Tierbilder aus vier Jahrtausenden. Antiken der Sammlung Mildenberg (Mainz 1983) 20 Nr. 9

5.10

English:	Parlasca 1969	K. Parlasca in: Helbig III ^{4}(Tubingen 1969) 98 sq. Nr. 2176
German:	Parlasca 1969	K. Parlasca in: Helbig III ^{4}(Tübingen 1969) 98 f. Nr. 2176
Italian:	Parlasca 1969	K. Parlasca in: Helbig III ^{4}(Tubinga 1969) 98 s. Nr. 2176
French:	Parlasca 1969	K. Parlasca in : Helbig III ^{4}(Tubingue 1969) 98 sq. Nr. 2176
Spanish:	Parlasca 1969	K. Parlasca en: Helbig III ^{4}(Tubinga 1969) 98 s. Nr. 2176

5.3 Type @Article

@Article This is probably the most common type because you find detailed information about specific topics in articles.

mandatory: author, title, subtitle, titleaddon, journaltitle, shortjournal, volume, number, issue year, pages,

optional: translator, origlanguage, related, relatedtype, doi, url, urldate, eprint, eprinttype, note, pubstate,

Here we have an example which will explain the (required) fields:

```
@Article{Evangelidis2014,
  author       = {Evangelidis, Vasilis},
  title        = {Agoras {and} Fora},
  subtitle     = {Developments in the Central Public Space of the Cities
    of Greece during the {Roman} Period},
  journaltitle = BSA,   %@String used
  shortjournal = BSA-short,   %@String used
  volume       = {109},
  pages        = {335--356},
  year         = {2014},
  doi          = {10.1017/s006824541400015x},
}
```

Example 5.11 – @Article{Evangelidis2014,...}

In line 5 and 6 you can also write the full or abbreviated journal title in the fields journaltitle or shorttitle (e. g. journaltitle = {British School of Athens}, shortjournal = {BSA}), but we chose to use a @String (cf. sections 3.4 and 8) again.

5.11 Evangelidis 2014 V. Evangelidis, Agoras and Fora. Developments in the Central Public Space of the Cities of Greece during the Roman Period, BSA 109, 2014, 335–356, DOI: 10.1017/s006824541400015x

5.4 Type @Proceedings

@Proceedings Similar to a collection but still different in the bibliographical output is proceedings. Therefore we recommend to use the type @Proceedings. The difference lies in the additional mandatory fields venue, eventdate and eventtitle. Everything else is like the type @Book.

mandatory: editor, title, subtitle, titleaddon, venue, eventdate, eventtitle, location, year

optional: maintitle, mainsubtitle, maintitleaddon, volume, publisher, series, number, edition, origyear, origlocation, origpublisher, translator, origlanguage, related, relatedtype, doi, url, urldate, eprint, eprinttype, note, pubstate,

An example:

```
@Proceedings{Kurapkat2014,
  title        = {Die Architektur des Weges},
  year         = {2014},
  editor       = {Kurapkat, Dietmar and Schneider, Peter I. and Wulf-
    Rheidt, Ulrike},
  subtitle     = {Gestaltete Bewegung im gebauten Raum},
  eventtitle   = {Kolloquium Architekturreferat des DAI},
  eventdate    = {2012-02-08/2012-02-11},
  venue        = Berlin,    %@String used
  series       = DiskAB,    %@String used
  number       = {11},
  organization = {Architekturreferat des DAI},
  publisher    = {Schnell + Steiner},
  location     = Regensburg,    %@String used
  shortseries  = DiskAB-short,    %@String used
```

```
15 }
```

Example 5.12 – @Proceedings{Kurapkat2014,...}

With venue we specify the place where the proceeding took place (e. g. *Berlin* – location is where the book was printed and is connected to the publisher e. g. *Regensburg*), eventtitle is used for a special title of the proceeding (e. g. *Kolloquium Architekturreferat des DAI*), eventtitle gives the date(range) when the proceeding was hold and has to be typed in in the format YYYY-MM-DD, a range has to be separated with a / (e. g. *2012-02-08/2012-02-11*).

In the bibliography the information of these additional fields will be used (of course) as this, notice how the output of the date changes according to the chosen language.

English:	Kurapkat et al. 2014	D. Kurapkat – P. I. Schneider – U. Wulf-Rheidt (ed.), Die Architektur des Weges. Gestaltete Bewegung im gebauten Raum. Kolloquium Architekturreferat des DAI Berlin February 8–11, 2012, DiskAB 11 (Regensburg 2014)
German:	Kurapkat u. a. 2014	D. Kurapkat – P. I. Schneider – U. Wulf-Rheidt (Hrsg.), Die Architektur des Weges. Gestaltete Bewegung im gebauten Raum. Kolloquium Architekturreferat des DAI Berlin 8.–11. Februar 2012, DiskAB 11 (Regensburg 2014)
Italian:	Kurapkat et al. 2014	D. Kurapkat – P. I. Schneider – U. Wulf-Rheidt (cur.), Die Architektur des Weges. Gestaltete Bewegung im gebauten Raum. Kolloquium Architekturreferat des DAI Berlino 8–11 febbraio 2012, DiskAB 11 (Ratisbona 2014)
French:	Kurapkat et al. 2014	D. Kurapkat – P. I. Schneider – U. Wulf-Rheidt (éd.), Die Architektur des Weges. Gestaltete Bewegung im gebauten Raum. Kolloquium Architekturreferat des DAI Berlin 8–11 février 2012, DiskAB 11 (Ratisbonne 2014)
Spanish:	Kurapkat y col. 2014	D. Kurapkat – P. I. Schneider y U. Wulf-Rheidt (ed.), Die Architektur des Weges. Gestaltete Bewegung im gebauten Raum. Kolloquium Architekturreferat des DAI Berlín 8-11 de febrero de 2012, DiskAB 11 (Ratisbona 2014)

5.12

5.5 Type @Inproceedings

@Inproceedings

This entry type works similar to @Procecedings and @Incollection and therefore the needed fields are straightforward to use:

mandatory: author, title, subtitle, titleaddon, editor, booktitle, booksubtitle, booktitleaddon, venue, eventdate, eventtitle, location, year, pages,

optional: maintitle, mainsubtitle, maintitleaddon, volume, publisher, series, number, edition, origyear, origlocation, origpublisher, translator, origlanguage, related, relatedtype, doi, url, urldate, eprint, eprinttype, note, pubstate,

```
1 @Inproceedings{Torelli1991,
2   author     = {Torelli, Mario},
3   title      = {Il \enquote{diribitorium} di Alba Fucens e il \enquote{
      campus} eroico di Herdonia},
4   pages      = {39--63},
```

```
  editor     = {Mertens, Josef},
  booktitle  = {Comunitá indigene e problemi della romanizzazione
    'nellItalia centro\--meri\-dionale (IV--III sec. a.C.)},
  location   = Brussels,    %@String used
  publisher  = {Institut Historique Belge de Rome},
  year       = {1991},
  venue      = Rome #{, Academia Belgica},    %@String used
  eventdate  = {1990-02-01/1990-02-03},
  eventtitle = {Actes du Colloque International Organisé à l'Occasion du
    50. Anniversaire de l'Academia Belgica et du 40. Anniversaire des
    Fouilles Belges en Italie},
  hyphenate  = {italian},
  language   = {italian},
  number     = {29},
  series     = {Études de philologie, d'archéologie et d'histoire
    anciennes},
  shorttitle = {Il \enquote{diribitorium}},
}
```

Example 5.13 – @Inproceedings{Torelli1991,...}

It will be printed as:

English:	Torelli 1991	M. Torelli, Il “diribitorium” di Alba Fucens e il “campus” eroico di Herdonia, in: J. Mertens (ed.), Comunitá indigene e problemi della romanizzazione nell’Italia centro–meridionale (IV–III sec. a.C.) Actes du Colloque International Organisé à l’Occasion du 50. Anniversaire de l’Academia Belgica et du 40. Anniversaire des Fouilles Belges en Italie Rome, Academia Belgica February 1–3, 1990, Études de philologie, d’archéologie et d’histoire anciennes 29 (Brussels 1991) 39–63
German:	Torelli 1991	M. Torelli, Il „diribitorium“ di Alba Fucens e il „campus“ eroico di Herdonia, in: J. Mertens (Hrsg.), Comunitá indigene e problemi della romanizzazione nell’Italia centro–meridionale (IV–III sec. a.C.) Actes du Colloque International Organisé à l’Occasion du 50. Anniversaire de l’Academia Belgica et du 40. Anniversaire des Fouilles Belges en Italie Rom, Academia Belgica 1.–3. Februar 1990, Études de philologie, d’archéologie et d’histoire anciennes 29 (Brüssel 1991) 39–63
Italian:	Torelli 1991	M. Torelli, Il «diribitorium» di Alba Fucens e il «campus» eroico di Herdonia, in: J. Anniversaire de l’Academia Belgica et du 40. Anniversaire des Fouilles Belges en Italie Roma, Academia Belgica 1-3 de febrero de 1990, Études de philologie, d’archéologie et d’histoire anciennes 29 (Bruselas 1991) 39-63

5.13

5.6 Type @Reference

@Reference

This entry type can be used especially for references if you want to cite it as whole or if you need to relate to it. We provide an example below—cf. section 5.7

You don't need to fill out many fields to have a working entry:

mandatory: title, shorthand,

optional: editor, subtitle, titleaddon, location, year maintitle, mainsubtitle, maintitleaddon, related, relatedtype, publisher, series, number, edition, volume, doi, url, urldate, eprint, eprinttype, note, pubstate,

And so a complete entry is quite small:

```
@Reference{LIMC,
  title     = LIMC,
  keywords  = {corpus},
  options   = {corpus},
  shorthand = LIMC-short,
}
```

Example 5.14 – @Reference{LIMC,...}

But you can also have it more detailed like this one:

```
@Reference{Lexikon-der-Technik,
  editor    = {Otto Lueger},
  title     = {Lexikon der gesamten Technik und ihrer Hilfswissenschaften
    },
  year      = {1904--1920},
  edition   = {2},
  location  = Stuttgart,  %@String used
  keywords  = {corpus},
  shorthand = {Lexikon d. T.},
}
```

Example 5.15 – @Reference{Lexikon-der-Technik,...}

5.7 Type @Inreference

@Inreference

Besides a whole reference you can also – and which is more likely – cite only an entry of it via the type @Inreference.

It will be more clear with an example:

```
@Inreference{Neils1994,
  author    = {Neils, Jenifer},
  title     = {Theseus},
  booktitle = LIMC-short,   %@String used
  pages     = {922--951},
  year      = {1994},
  volume    = {7.1},
  keywords  = {lexikon},
}
```

Example 5.16 – @Inreference{Neils1994,...}

You can cite this entry with any of the provided \cite-commands above—cf. sections 3.3 and 7.3.

But for the final display of the entry you have two possibilities:

(a) Either you want it in the default style ›author-year‹, so it will have a label and is referenced to your final bibliography, then you don't have to do anything. In the bibliography it will look like

> **5.16** Neils 1994 LIMC 7.1 (1994) 922–951 s. v. Theseus (J. Neils)

(b) The German Archaeological Institute has a special rule for inreferences in the footnote. Then the output will be like:
reference volume (year) pages s.v. title (author)
and there will be no reference to the bibliography since the entry is fully described in the footnote. If you prefer this method you have to use the preamble option called inreferences—cf. section 4.1.9 Then it will look like this in the footnote:

inreferences

> LIMC 7.1 (1994) 922–951 s. v. Theseus (J. Neils)

When you have the [⟨*postnote*⟩] filled out in a citation which belongs to an @Inreference then it won't be printed in the end of the citation.

```
\cite[vgl.][930 Nr. 283]{Neils1994}.
```

The postnote [⟨*930 Nr. 283*⟩] will be printed instead of the pages:

> vgl. LIMC 7.1 (1994) 930 Nr. 283 s. v. Theseus (J. Neils).

As mentioned above it is of advantage when you relate entries like an @Inreference with its @Reference. And since not all references have a ›canonical‹ abbreviation (e. g. RE, LIMC, DNP, LTUR, LÄ, etc.) it might be necessary to define a shorthand. This is shown in the example below.

```
@Inreference{Weinbrenner1914,
  author    = {Weinbrenner},
  title     = {Rennbahn},
  booktitle = {Lexikon d. T.},
  pages     = {636--637},
  year      = {1914},
  related   = {Lexikon-der-Technik},
  volume    = {9},
  number    = {2},
}
```

Example 5.17 – @Inreference{Weinbrenner1914,...}

As you see this entry is related to Lexikon-der-Technik which is described above and has a shorthand = {Lexikon d. T.} You just need to make sure that booktitle of the @Inreference and the shorthand of the @Reference are equal so the title can be referenced properly in the bibliography.

For the following bibliography result we just typed (assuming that the entries were already cited in text):

```
\printbibliography[keyword=corpus,title={Corpora}]
\printbibliography[notkeyword=corpus]
```

Corpora

Lexikon d. T. O. Lueger (ed.), Lexikon der gesamten Technik und ihrer Hilfswissenschaften [2](Stuttgart 1904–1920)

5.15; 5.17

References

Weinbrenner 1914
Lexikon d. T. 9 (1914) 636–637 s. v. Rennbahn [2] (Weinbrenner)

5.8 Type @Review

@Review

Reviews in journals are best cited when they are edited as a @Review. For a full citation of a review you have to name the reviewed work in detail. The following example will show an easy way to combine the review with the reviewed work.

mandatory: author, title, subtitle, titleaddon, journaltitle, shortjournal, volume, number, issue year, pages, related, relatedtype,

optional: translator, origlanguage, doi, url, urldate, eprint, eprinttype, note, pubstate,

What you need are two separate entries: one as a @Review the other is a @Book, @Collection, @Proceedings or something else.

First we have the reviewed work:

```
@Book{Welch2007,
  author    = {Welch, Katherine E.},
  title     = {The {Roman} Amphitheatre},
  subtitle  = {From its Origins to the Colosseum},
  publisher = CUP,    %@String used
  location  = {Cambridge and New York},
  year      = {2007},
}
```

Example 5.18 – @Book{Welch2007,...}

then the review itself:

```
@Review{Bell2011,
  author       = {Bell, Sinclair},
  number       = {1},
  pages        = {1--4},
  volume       = {115},
  journaltitle = AJA,   %@String used
  shortjournal = AJA-short,   %@String used
  related      = {Welch2007},
  relatedtype  = {reviewof},
  year         = {2011},
```

```
11   publisher    = {Archaeological Institute of America},
12 }
```

Example 5.19 – @Review{Bell2011,...}

You maybe noticed that the reveiw (Bell2011) is with the field related in line 8 connected to the entry Welch2007. In addition we not only need a connected work but also to qualify the relation: This is done in line 9 with relatedtype = {reviewof}. This so-called bibstring is especially for reviews and contains the language based correct abbreviation for *Review of* or e. g. *Rez. zu*. You don't have to type in all relevant information of the reviewed work in the entry of the review, since they will be inserted automatically and dynamically with the related-function. So whenever settings in the reviewed work are changed the print of the review will be automatically adjusted. Furthermore, even if the review is cited, the reviewed work won't be listed in the bibliography until it is explicitly cited in the text.

5.19 Bell 2011 S. Bell, rev. of K. E. Welch, The Roman Amphitheatre. From its Origins to the Colosseum (Cambridge 2007), AJA 115/1, 2011, 1–4

5.8.1 Reviews with an individual title

Some reviews are more detailed then others and have their own title which should be displayed in the bibliography. In these cases you can use the field title the other things stay the same.

The following entry is an example reviews the book by Welch, too but with an individual title:

```
1  @Review{Hufschmid2010,
2    author       = {Hufschmid, Thomas},
3    title        = {Von Caesars \emph{theatron kynegetikon} zum \emph{
       amphitheatrum novum} Vespasians},
4    pages        = {487--504},
5    volume       = {23},
6    journaltitle = JRA,   %@String used
7    shortjournal = JRA-short,   %@String used
8    related      = {Welch2007},
9    relatedtype  = {reviewof},
10   year         = {2010},
11 }
```

Example 5.20 – @Review{Hufschmid2010,...}

In the bibliography there will be first the individual title followed by the information of the reviewed work.

5.20 Hufschmid 2010 T. Hufschmid, Von Caesars *theatron kynegetikon* zum *amphitheatrum novum* Vespasians, rev. of K. E. Welch, The Roman Amphitheatre. From its Origins to the Colosseum (Cambridge 2007), JRA 23, 2010, 487–504

5.8.2 multiple reviewed works in one review

Some reviews analyse several works in the same article. This makes no big difference for the citing or editing process.

In his review R. Taylor not only describes the book called *The Roman Amphitheatre* (2007) by K. E. Welch, but at the same time compares it with F. Sears *Roman Theatres* (2006).

The entry of the first analysed book *The Roman Amphitheatre* (2007) has been described in section 5.8. The entry of the second reviewed book is this:

```
@Book{Sear2006,
  author     = {Sear, Frank},
  title      = {Roman Theatres},
  subtitle   = {An Architectural Study},
  publisher  = OUP,   %@String used
  location   = {Oxford},
  year       = {2006},
  series     = {Oxford Monographs on Classical Archaeology},
}
```

Example 5.21 – @Book{Sear2006,...}

The entry of the review looks like this:

```
@Review{Taylor2008,
  author       = {Taylor, Rabun},
  number       = {3},
  pages        = {443--445},
  volume       = {67},
  journaltitle = {Journal of the Society of Architectural Historians},
  related      = {Sear2006,Welch2007},
  relatedtype  = {reviewof},
  year         = {2008},
}
```

Example 5.22 – @Review{Taylor2008,...}

In the field `related` you can have several ⟨*bibtex-keys*⟩ which has to be separated by a comma (see line 7).

And in the bibliography all information is gathered:

5.22 Taylor 2008 R. Taylor, rev. of F. Sear, Roman Theatres. An Architectural Study, Oxford Monographs on Classical Archaeology (Oxford 2006) – K. E. Welch, The Roman Amphitheatre. From its Origins to the Colosseum (Cambridge 2007), Journal of the Society of Architectural Historians 67/3, 2008, 443–445

5.9 Type @Thesis

For MA and PhD thesis, which are not published a monograph or such, can be cited when they are edited as `@Thesis`. It is important to differentiate whether it is a MA or a PhD thesis, this can be done by `type={`⟨`phdthesis`⟩`}` or `{`⟨`mathesis`⟩`}`; you also have to define the `institution={`⟨*university*⟩`}`.

mandatory: author, title, subtitle, titleaddon, type, institution, year,

optional: doi, url, urldate, eprint, eprinttype, note, pubstate,

Here is an example:

```
@Thesis{Arnolds2005,
  author       = {Markus Arnolds},
  title        = {Funktionen republikanischer und frühkaiserzeitlicher
    Forumsbasiliken in Italien},
  type         = {phdthesis},
  institution  = {Ruprecht-Karls-Universität zu Heidelberg},
  eprint       = {urn:nbn:de:bsz:16-heidok-74406},
  eprinttype   = {urn},
  date         = {2005-05-31},
}
```

Example 5.23 – @Thesis{Arnolds2005,...}

Here is the entry in the bibliography:

Arnolds 2005 — M. Arnolds, Funktionen republikanischer und frühkaiserzeitlicher Forumsbasiliken in Italien (PhD thesis Ruprecht-Karls-Universität zu Heidelberg 2005), URN: urn:nbn:de:bsz:16-heidok-74406 — 5.23

5.10 Type @Talk

For (oral) given papers e. g. at a colloquium or a proceeding we created a new entry type called ›@Talk‹.

mandatory: author, title, subtitle, titleaddon, date, venue, institution, eventtitle, eventdate,

optional: doi, url, urldate, eprint, eprinttype, note, pubstate,

Here is an example for a paper given in Berlin in 2015:

```
@Talk{Bergmann2015,
  author       = {Bergmann, Birgit},
  title        = {\enquote{An exciting find}},
  date         = {2015-04-27},
  subtitle     = {Neues zum Forums-Fries der Praedia Iuliae Felicis},
  titleaddon   = {(Pompeii II, 4)},
  url          = {https://www.antikezentrum.hu-berlin.de/de/
    veranstaltungskalender/bibergmann},
  urldate      = {2016-05-14},
  eventtitle   = {Kolloquium der Klassischen Archäologie},
  institution  = {Freie Universität Berlin},
  venue        = Berlin,
}
```

Example 5.24 – @Talk{Bergmann2015,...}

The bibliography will show the entry as:

5.24	Bergmann 2015	B. Bergmann, “An exciting find”. Neues zum Forums-Fries der Praedia Iuliae Felicis. (Pompeii II, 4), talk April 27, 2015, Freie Universität Berlin. Kolloquium der Klassischen Archäologie Berlin, <https://www.antikezentrum.hu-berlin.de/de/veranstaltungskalender/bibergmann> (05/14/2016)

6 Bibliography

\printbibliography
seenote

As long as you don't use the optionseenote—for which a final bibliography is not needed—you will need to print you cited entries in a bibliography at a certain place in your document. It can be useful to differentiate your bibliography and divide it e. g. into a bibliography with ancient authors and one with modern scholars. Additionally you can have a bibliography with the shorthand shortcuts or all abbreviated journal titles, etc.

How the different bibliographies can be set up is explained now: Let's assume you want to have a bibliography with the ancient authors and one with modern scholars. Since the entries of the ancient authors have the field keyword={ancient} (or should have it) this is done quite easy.

But first we define the heading of the whole bibliography:

```
\printbibheading[%
              heading=bibliography,%
              %heading=bibnumbered,% if you want it numbered
              title={Bibliography}] %heading for bibliography
```

You can give any title you would like to give (title = {⟨*any title*⟩}).

The next step is to set up the bibliography for the ancient authors.

```
\printbibliography[%
              keyword=ancient,%
              heading=subbibliography,
              %heading=subbibnumbered,% if you want it numbered
              title={Ancient authors and works}]
```

We tell the bibliography just to contain the entries which have have ancient in the field keywords (line 2).

Finally the bibliography for modern scholars:

```
\printbibliography[%
              notkeyword=ancient,%
              notkeyword=corpus,%
              heading=subbibliography,
              %heading=subbibnumbered,% if you want it numbered
              title={Secondary literature}]
```

This time we exclude all entries which have ancient or corpus in the field keywords. That's it. (Don't be surprised about the line notkeyword=corpus which excludes entries with special shorthand labels, a further bibliography part with all the shorthands is described below.).

Now have a look how it looks like with all the entries we explained above.

Bibliography

Ancient authors and works

Apul. met. L. Apuleius Madaurensis, metamorphoses

Cic. Att. M. Tullius Cicero, Atticus-Briefe, *epistulae ad Atticum*, ed. and trans. from Latin by H. Kasten, Tusculum Bücherei [3](Düsseldorf 1959; repr. Düsseldorf 1980)

Cic. Sest. M. Tullius Cicero, Rede für P. Sestius, *pro P. Sestio*, trans. from Latin by M. Fuhrmann, in: M. Fuhrmann (ed.), Die politischen Reden II, Sammlung Tusculum (Munich 1993) 110–185

Fest. W. M. Lindsay (ed.), De verborum significatu quae supersunt cum Pauli epitome, Bibliotheca scriptorum et Graecorum et Romanorum Teubneriana (Leipzig 1913; repr. Leipzig 1965)

Quint. inst. M. Fabius Quintilianus, Ausbildung des Redners. Institutio oratoria, trans. from Latin by H. Rahn [6](Darmstadt 2015)

Secondary literature

Arnolds 2005 M. Arnolds, Funktionen republikanischer und frühkaiserzeitlicher Forumsbasiliken in Italien (PhD thesis Ruprecht-Karls-Universität zu Heidelberg 2005), URN: urn:nbn:de:bsz:16-heidok-74406

Zanker 2009 P. Zanker, Augustus und die Macht der Bilder [5](Leipzig 1987; repr. Munich 2009),
ZENON (OPAC): 000250713

You can create as many bibliographies as you wish each with an other keyword if you like. Or you can make a bibliography with all the shorthands used in your text—for that we use keyword= {corpus} (line 2):

```
\printbibliography[%
            keyword=corpus,%
            heading=subbibliography,
            title={Abbreviation and corpora}]
```

Now the bibliography only lists the used entries which have corpus in the field keywords:

Abbreviation of corpora

CIL Corpus inscriptionum Latinarum (Berlin)

Lexikon d. T. O. Lueger (ed.), Lexikon der gesamten Technik und ihrer Hilfswissenschaften [2](Stuttgart 1904–1920)

LIMC Lexikon iconographicum mythologiae classicae

LTUR E. M. Steinby (ed.), Lexikon topographicum urbis Romae (Rome 1993–2000)

ThesCRA Fondation pour le Lexicon Iconographicum Mythologiae Classicae (ed.), Thesaurus Cultus et Rituum Antiquorum (Los Angeles 2004–2012)

Note: If you want to separate in your bibliography author-year labels from `shorthand` labels you should insure yourself that bibliography entries which contain a `shorthand` denomination are set with a keyword either `ancient`, `corpus` or something else, to guarantee that there is no bibliographical shortcut wrongly sorted in the bibliography.

Furthermore you can have a bibliography for all the abbreviated journal titles and series to have the abbreviation and its long form. For journals it works like this:

```
\printbiblist[%
          heading=subbibliography,
          title={Abbreviation of journals}]{shortjournal}
```

Abbreviation of journals

AJA	American Journal of Archaeology
AyasofyaMüzYıl	Ayasofia Müzesi yıllığı. Annual of Ayasofya Museum
BaM	Baghdader Mitteilungen
BeStAR	BeStAR. Berliner Studien zum Antiken Rom
BSA	The Annual of the British School at Athens
ClJ	The Classical Journal
JRA	Journal of Roman Archaeology

For series it is done like this:

```
\printbiblist[%
          heading=subbibliography,
          title={Abbreviation of series}]{shortseries}
```

Abbreviation of series

DiskAB	Diskussionen zur archäologischen Bauforschung
MemAmAc	Memoirs of the American Academy in Rome
MKT	Menschen – Kulturen – Traditionen. Studien aus den Forschungsclustern des Deutschen Archäologischen Instituts
Philologus Suppl.	Supplement

7 FAQ: For Ancient (scholars of high) Quality

7.1 Following pages

`\psq` If you have to cite two following pages there is the macro `\psq` which is best to you since it is also controlled by the set up language. Just write the first page in the [⟨*postnote*⟩] and then the `\psq`—cf. example 5.10.

7.2 Online referencing

eprint
eprinttype

If you have a paper or book which is available in the internet via a permanent link there a different possibilities referring to it—see also the biblatex-documentation chapter 3.11.7.[14]

jstor

If you can refer to the on-line plattform jstor then you need the individual number for the article—cf. example 4.9:

```
eprint = {⟨jstor-number⟩}
eprinttype = {jstor}
```

OR—cf. example 4.10

```
jstor = {⟨jstor-number⟩}
```

urn

For all papers referable via an ›urn‹ (*Uniform Resource Name*), which have been registered at the German National Library—cf. example 5.23

```
eprint = {⟨urn:xxx⟩}
eprinttype = {urn}
```

OR

```
urn = {⟨urn:xxx⟩}
```

zenon

This is eprint-form is especially designed for the OPAC of the German Archaeological Institute. All bibliographical entries in this OPAC can be referred to via this link. You only need to insert the individual Zenon-number of the entry, e. g. *http://zenon.dainst.org/Record/001371402* where *001371402* is the individual number—cf. example 5.3.

```
eprint = {⟨Zenon-number⟩}
eprinttype = {zenon}
```

OR cf. examples 4.10; 4.13.

```
zenon = {⟨Zenon-number⟩}
```

doi

In addition you can also refer to a document via its doi-number—cf. examples 4.9; 5.11

```
doi = {⟨doi-number⟩}
```

7.3 Brackets (with @Inreference)

Be aware to stick to the correct order of parentheses and brackets. The rule says that within a pair of parentheses you have to use square brackets. Citing @Inreferences can lead easily to a false behaviour when you put it in parentheses. This is an example how it should not be done:

```
\cite[vgl.][930 Nr. 283]{Neils1994}.
```

[14] You can also use as an eprinttype: arXiv, pubmed, hdl, googlebooks.

(vgl. LIMC 7.1 (1994) 930 Nr. 283 s. v. Theseus (J. Neils)). WRONG!

\parencite
\parencites
inreferences

This example shows that the correct order of parentheses has not been followed. Especially when you activated the preamble option `inreferences=true` you should use `\parencite{`⟨*bibtex-key*⟩`}` instead (section 3.3), then the correct order of parentheses and square brackets is given:

```
\parencite[vgl.][930 Nr. 283]{Neils1994}.
```

(vgl. LIMC 7.1 [1994] 930 Nr. 283 s. v. Theseus [J. Neils]). CORRECT!

7.4 Unknown work

Sometimes it is impossible to get hold of the author or editor but you still want to cite them. If you come along such a paper you can define a `label` which will be used for citing and sorting. This is not connected to an entry type – it can be used with any work. In the following example we use an entry type `@Article`:

```
1  @Article{Cosa1949,
2    title        = {Cosa},
3    subtitle     = {Republican Colony in Etruria},
4    journaltitle = ClJ,
5    shortjournal = ClJ-short,
6    volume       = {45},
7    pages        = {141--149},
8    year         = {1949},
9    label        = {Cosa},
10   number       = {1},
11 }
```

Example 7.1 – @Article{Cosa1949,...}

The `label` (line 9) can be defined as one wishes in this case we chose it analogous to the title: `label = {Cosa}`. When you cite such an anonymous work it will be done like all the others:

```
\cite[vgl.][145--146]{Cosa1949}
```

It will look like this:

vgl. Cosa 1949, 145–146

and be printed in the bibliography like this:

7.1 Cosa 1949 Cosa. Republican Colony in Etruria, ClJ 45/1, 1949, 141–149

7.5 Publication status

Sometimes you know the author of an article or a book, proceedings etc. and you get a proof of the work beforehand. You can also cite this version of the work and provide information about the publication status in the field `pubstate`. This field is usable with all entry types provided (except `@Talk`). There are some predefined publication status which are recommended to use since they are translated into the used language:

inpreparation Typoscript is prepared for your publication.

```
pubstate = {inpreparation}
```

submitted Typoscript has been submitted.

```
pubstate = {submitted}
```

forthcoming Typoscript has been accepted by the journal.

```
pubstate = {forthcoming}
```

inpress Typoscript has been edited and you have a proof version of it.

```
pubstate = {inpress}
```

prepublished Article has been published in an (online) preversion.

```
pubstate = {prepublished}
```

This following example is about an article which was accepted by the journal and so we use `pubstate = {forthcoming}`:

```
@Article{Bossert:forthcoming,
  author       = {Lukas C. Bossert},
  title        = {\ldots\ \textsc{in formam anitqvam restitvto}?},
  subtitle     = {Überlegungen zur Inschrift der ›Porticus Deorum
    ‹Consentium (CIL\,VI 102) und ihren Ergänzungen im 19.{\,}Jh.},
  journaltitle = {BeStAR. Berliner Studien zum Antiken Rom},
  shortjournal = {BeStAR},
  volume       = {2},
  pubstate     = {forthcoming},
}
```

Example 7.2 – @Article{Bossert:forthcoming,...}

7.2	Bossert forthcoming	L. C. Bossert, ... IN FORMAM ANITQVAM RESTITVTO? Überlegungen zur Inschrift der ›Porticus Deorum Consentium‹ (CIL VI 102) und ihren Ergänzungen im 19. Jh. BeStAR 2, forthcoming

8 Additional bibliography with ancient authors and works

The bibliography `archaeologie-bibancient.bib` is filled with ancient authors, works and their abbreviation according to The New Pauly. The bold entry on the left is the `bibtex-key`.[15] All the entries have the fields `keywords={ancient}`, `options={ancient}`.

Acc — **Acc.**
Accius

AchTat — **Ach. Tat.**
Achilleus Tatios

Ael:Ep — **Ael. Ep.**
Aelian
Epistulae rusticae

Ael:Fr — **Ael. Fr.**
Aelian
Fragmenta

Ael:NA — **Ael. NA**
Aelian
de natura animalium

Ael:Tact — **Ael. Tact**
Aelianus Tacticus
Tactica (De instruendis aciebus)

[15] If you think the list should be enlarged, let us know the entries.

Ael:VA **Ael. VH**

Herakleides Pontikos

Herm:Trism **Herm. Trism.**
Hermes Trismegistos

Herodian **Herodian.**
Herodian
ab excessu divi Marci

Hes:cat **Hes. cat.**
Hesiodos
Catalogues feminarum (ἠοίαι)

Hes:erg **Hes. erg.**
Hesiodos
opera et dies (ἔργα καὶ ἡμέραι)

Hes:scut **Hes. scut.**
Hesiodos
scutum (ἀσπίς)

Hes:theog **Hes. theog.**
Hesiodos
Theogonia

Hesych **Hesych.**
Hesychios

Hier:chron **Hier. chron.**
Hieronymos
chronicon

Hier:comminEz **Hier. comm. in Ez**
Hieronymos
commentaria in Ezechielem (PL 25)

Hier:epist **Hier. epist.**
Hieronymos
epistulae

Hier:On **Hier. On.**
Hieronymos
Onomastikon

Hier:virill **Hier. vir. ill.**
Hieronymos
de viris illustribus

Hippokr **Hippokr.**
Hippokrates

HL **HL**
Hohelied

Hom:h **Hom. h.**
Homer
Hymni Homeri

Hom:Il **Hom. Il.**
Homer
Ilias

Hom:Od **Hom. Od.**
Homer
Odyssee

Hor:ars **Hor. ars**
Horaz
ars poetica

Hor:carm **Hor. carm.**
Horaz
carmina

Hor:carmsaec **Hor. carm. saec.**
Horaz
carmen saeculare

Hor:epist **Hor. epist.**
Horaz
epistulae

Hor:epod **Hor. epod.**
Horaz
epodi

Hor:sat **Hor. sat.**
Horaz
saturae (sermones)

Hyg:astr **Hyg. astr.**
Hygin
astronomica

Hyg:fab **Hyg. fab.**
Hygin
fabulae

Iambl:demyst **Iambl. de myst.**
Iamblichos
de mysteriis

Iambl:protr **Iambl. protr.**
Iamblichos
protrepticus in philosophiam

Iambl:vP **Iambl. v. P.**
Iamblichos
de vita Pythagorica

InstIust **Inst. Iust.**

Corpus Iuris Civilis, Institutiones

10 List of locations

lstlocations

If you use the option lstlocations it will load an additional bibliography called archaeologie-lstlocations.bib.[17] Below you find a list with the available locations in five (at maximum) different languages. The bold entry on the left is to use for location=⟨*location*⟩ – do not put ⟨*location*⟩ into {}. In these examples we used such @Strings: examples 4.6?? 4.11–4.13?? 4.15–4.17; 5.1; 5.3; 5.5; 5.9; 5.10; 5.12; 5.13; 5.15; 5.24

WBG Wissenschaftliche Buchgesellschaft

WdG Walter de Gruyter

YUP Yale University Press

12 List of abbreviation according to the German Archaeological Institute-guidelines

@String We modified the lists with abbreviations of journals, corpora, etc. to make them usable with bibLaTeX. Below there are two lists with@String (in **bold** letters on the left), one with the abbreviations (section 12.1), the other with the long forms (section 12.2).

[18] If you think the list should be enlarged, let us know the entries.

We recommend to look up the journal names in the list and insert the @String in the fields journaltitle and shortjournal, or series and shortseries.

12.1 Short form
